

## OrthoEx to handle Hyprevention with 3<sup>rd</sup> Party Logistics for US Operations

February 28th, 2022

**SCOTTSDALE, Ariz.-(OrthoSpineNews)-** [OrthoEx](#), A third-party logistics (3PL) company that supports medical device companies to outsource their costly distribution, warehousing, and billing functions will handle Hyprevention with its US Operations.

Hyprevention has created the V-STRUT® is a Vertebral Implant indicated for the treatment of vertebral fracture due to osteoporosis or tumorous bone lesions in the thoracic or lumbar spine. Two devices, made of PEEK polymer, are inserted in the vertebral body through the pedicles and combined with PMMA bone cement. V-STRUT® Vertebral Implant is anchored in the pedicles to allow the vertebral endplate support and stress distribution in the entire vertebrae. The device is FDA cleared and available for use in the US.

“We are very excited to be the operational support for such an innovative company in its growth phase. Cécile and her team are the forward thinkers we like to partner with.” Said Tony Passalacqua, CEO at OrthoEx

“We are very happy to work with ORTHOEX for warehousing and product shipment in the US. The team is so efficient and conscientious. They will definitively support our success and growth!” said Cécile Vienney, CEO at Hyprevention.

### **About OrthoEx**

A third-party logistics (3PL) company, OrthoEx allows medical device companies to outsource their costly distribution, warehousing, and billing functions. Our platform was designed by orthopedic industry leaders with vast experience. OrthoEx is committed to developing and implementing the highest quality, most cost-effective solutions that enable manufacturers to remain competitive without constraining growth.

### **About Hyprevention**

Founded in 2010 by Cécile Vienney (CEO) and 3 orthopedic surgeons, Hyprevention is a start-up located in Bordeaux-France that develops, manufactures and markets implantable medical devices. Hyprevention Inc. was created in 2021 to distribute V-STRUT© across the United States.
